

ACOUSTIC SHELL® DYNAMICFLOW® Assembly Instructions

Prior to the installation, make the necessary measurements on the stage in order to check the exact position of each DYNAMICFLOW® piece. This task should be carried out with the help of markings made with self-adhesive tape. Make sure that the positions are well marked before opening and start installing any module.

Throughout the whole installation, you are going to need four people, a double-flight scaffolding (each flight should be 2 metres high), and four pairs of gloves.

This model was not developed for outdoor usage. For security reasons outdoor usage of this model will be at your own risk. JOCAVI® will not accept responsibility for any misuse of this product.

Please follow these steps:

1. Position the piece on the place where you want to install it. Lock the brakes of the wheels with the feet.

2. Remove the top lid and store it outside the stage.

3. Remove the first module from inside the flight-case.

4. Remove the three feet from inside the box and insert them in their places.

5. Level them off.

6. Make sure they are well embedded.

7. Before installing the modules move the box to the chosen place.

8. Check again that the three threaded feet are well adjusted and leveled.

9. Remove the second module from inside the box and insert it on its position.

10. Remove the front lid and store it.

11. Remove the third module from inside the box and insert it on its position. For this operation, you will need a double-flight scaffolding.

12. Place it, carefully with help.

13. Now, remove the fourth module from the flight-case.

14. And insert it on its position. Make sure it is well embedded.

15. Congratulations, your DYNAMICFLOW® AcSh® is installed. Ready and set for the show!!
